Summary

Computer Programmer with a background in Health Science and data entry. Effective at picking up new skills quickly and understanding others code. Known among peers for natural problem-solving skills related to debugging web applications, and known to work collaboratively and efficiently with a team.

Projects

Citizen Science App

2024

- Admin Website lets teachers set up projects, create a project code, and read observations made by students.
- App lets students type in a project code and enter observations.
- I was in charge of developing the admin website and connecting it to the database.

Wishy Washy

2019

- Back of house gig app for the service industry for filling time slots nobody can cover
- I was the main back end developer for this project and did the manager half the website

Rushed

2019

- A education-match app that suggests next steps towards a chosen career path.
- I was in charge of making all the API calls work and fixing all the merge conflicts.

Experience

Molly Brown Temps

Issaquah, WA

Jewelry Assembly

2022-2023

- Assembled jewelry for Costco on a production line to keep up with international demands.
- Trained in multiple positions such as assembling, tossing, along with boxing and sending.
- Had to keep track of large amounts of product while quickly getting it ready for sending to different locations across the world.
